## Chapter 2 : Nuclear Weapons Solutions

A nuclear weapon is an explosive device that derives its destructive force from nuclear reactions, either fission (fission bomb) or from a combination of fission and fusion reactions (thermonuclear bomb). The state of Israel is widely believed to possess nuclear weapons. Current estimates put the size of the Israeli nuclear arsenal at between 80 and 400 nuclear warheads, and the country is believed to possess the ability to deliver them in a variety of methods including: aircraft; submarine-launched cruise missiles; and the Jericho series of missiles. Facts about nuclear weapons. Nuclear and conventional weapons. What are conventional weapons? How do nuclear weapons differ from conventional weapons? Abolishing nuclear weapons published in Futures, Journal of Policy, Planning and Future Studies, UK, May 2007 by Jasjit Singh, Director, Centre for Strategic & International Studies, New Delhi. What are conventional weapons? A weapon is used to mean an explosive weapon, such as a bomb, the warhead of a missile or an artillery shell. All such weapons contain explosive material which explodes when suitably triggered. Although the United States stopped producing new nuclear weapons over 20 years ago in the aftermath of the Cold War, the nuclear weapons complex (NWC), administered by the National Nuclear Security Administration (NNSA), is still a very active sector of the U.S. national security system. Modern nuclear weapons work by combining chemical explosives, nuclear fission, and nuclear fusion. The explosives compress nuclear material, causing fission; the fission releases massive amounts of energy in the form of X-rays, which create the high temperature and pressure needed to ignite fusion. "A nuclear war cannot be won and must never be fought." Ronald Reagan, 1984 State of the Union. Despite the end of the Cold War over two decades ago, humanity still has over 14,400 nuclear weapons.

Benefits of nuclear weapons. February 14, 2010, J. Juliet, 46 comments. Benefits of nuclear weapons. Nuclear weapons have existed for several years now and so has the debate about the need for making these weapons. "It is a measure of arrogance to assert that a nuclear weapons-free world is impossible when 95% of the nations of the world are already nuclear-free. Excellent news – this destroys the notion that the US can initiate a first strike & be protected by their ring of ABM systems surrounding Russia which the new weapons nullify. Plutonium capable of being used in a nuclear weapon, conventional explosives, and highly toxic chemicals have been improperly packaged or shipped by nuclear weapons contractors at least 25 times in the past five years, according to government documents. In a March 1 address to the nation, Russian President Vladimir Putin evoked Soviet-era exaggeration. He proclaimed barely feasible economic and social goals and boasted of nuclear arms that are. What is the truth about Iranian nuclear intentions? If you listen to Netanyahu, the Israeli prime minister, you would think that it's an impending matter of life and death, and that Israel will surely be destroyed if Iran even gets the capability to enrich uranium for peaceful purposes.

J. Robert Oppenheimer (April 22, 1904 – February 18, 1967) was an American theoretical physicist, best known for his role as the scientific director of the Manhattan Project, the World War II effort to develop the first nuclear weapons, at the secret Los Alamos Laboratory in New Mexico. Beyond nuclear aims to educate and activate the public about the connections between nuclear power and nuclear weapons and the need to abandon both to safeguard our future. Beyond nuclear advocates for an energy future that is sustainable, benign and democratic. North Korea's nuclear programme remains a source of deep concern for the international community. Despite multiple efforts to curtail it, Pyongyang says it has conducted five nuclear tests. Radioactive waste management: nuclear power is the only energy-producing technology which takes full responsibility for all its wastes (radwastes) including nuclear waste disposal, management of radioactive waste and fully costs this into the product.
